

GreenEnergyWorld
connecting visions

Company Presentation_2009

GreenEnergyWorld - Mission Statement

Connecting Visions

The GreenEnergyWorld slogan „connecting visions“ represents the central idea of the company's activities. As a marketing company for wind energy projects, GreenEnergyWorld aims to connect project developers and operators with suitable investors to realise their projects. Whether it is the sales of a turnkey wind farm or the search for a financial investor to start a co-development project, GreenEnergyWorld focusses on bringing the investor with the strategic FIT.

The latest development in the financial and wind business market makes it even more important today to identify and connect the right partners with matching visions. Only a strategic FIT can result in a sustainable win-win situation for all parties.
