

## **GreenEnergyWorld starts project acquisition in the French wind energy market**

**Berlin – The service provider for wind energy projects GreenEnergyWorld is expanding its activities into the markets between the Mediterranean and Atlantic. The company will be represented on the European Wind Energy Conference and Exhibition (EWEC) from March 16th – 19th 2009 in Marseille.**

GreenEnergyWorld markets wind farms throughout Europe. Currently the company concentrates on France in its development of new markets. Managing Director Denis Kühn gives reasons for the decision: "Dynamics in the wind industry guarantee even in times of a global financial crisis strong impulses. This applies especially to France and Spain. The latest act amendment in both countries has a positive impact on our business. In Spain our interest is focused on operating wind farms, in France more on projects under development."

GreenEnergyWorld captures markets in France and Spain and addresses specifically project developers and operators of wind farms. Nora Lück is responsible for business development in both countries and fluent in both national languages.

"Recognizing, that the marketing of wind projects usually takes some time, we have already managed for a good start in France. Although our market activities have just begun, we have already started negotiations with investors about two French wind farm projects", she reports. The Junior Business Development Manager is optimistic: "This is for a start. We expect a lot from the EWEC in Marseille. Our objective there is to acquire wind farm projects in France. Additionally, we will use this European wind exhibition to intensify our relationships with international project developers and investors. Visitors can find us in hall 3, stand 3818."

### **About GreenEnergyWorld**

As a marketing agency the company supports project developers and operators with the implementation and marketing of their wind farms. GreenEnergyWorld's commitment addresses all project stages from greenfield, development, turn key to operation and repowering. The online project market [www.greenenergy-world.com](http://www.greenenergy-world.com) is an international exchange interface for global investors and local project developers. Projects are offered from a variety of European countries.
