

**2008.09.09 Husum, Press Release**

## **GreenEnergyWorld – International Trading Portal for Wind Energy Projects at HUSUM WindEnergy 2008, Sept. 09 - 13**

**GreenEnergyWorld is a service provider in the field of renewable energies, supporting project developers and operators with the implementation, marketing and selling of wind farms. GreenEnergyWorld's online trading portal is a mediating interface for project developers and operators of windfarms and global investors. GreenEnergyWorld's stand A26 is in hall 3.**

### **Finding the right partner**

Even investors are globally searching for attractive investments. Operators and project developers, however, are in desperate need for fresh capital. The global market for renewables is still young and yet showing explosive development. Regardless of this, idea and capital are having a hard time finding each other. This is where the young, Berlin based company GreenEnergyWorld GmbH is docking with her business idea. They have the vision, to unite capital and ideas: "connecting visions". Special about the marketing service is GreenEnergyWorld's Europe-wide cooperation partner system. Plus, they also have access to a network of international experts in the renewables industry: i.e. consultants, auditors, equipments manufacturers, contractors and lawyers.

### **Windfarms in all project stages**

Via the online trading portal [www.green-energy-world.com](http://www.green-energy-world.com) project developers, operators and investors will be able to come closer efficiently and goal-oriented. Currently, GreenEnergyWorld is concentrating on the marketing of wind farms. The projects are on offer range between greenfield and turnkey installations. Especially the young and developing East-European energy markets in Bulgaria and Poland are the focus of project acquisition. In every country cooperation partners are collaborating with GreenEnergyWorld. They are locally connecting with project developers and then continuing collaboration on site.

Key to a successful marketing of wind turbines are the systematic assessment of project data and comprehensive project exposés. Crucial to the success of the services are a sound knowledge and experience with project development at home and abroad. This way the seven team members of GreenEnergyWorld are able to successfully support their clients with selling projects and searching for the best access to capital.

GreenEnergyWorld stands out due to its high quality standards for the project assessment. Projects will be thoroughly checked in advance. Evaluation and assessment of profitability are core steps in GreenEnergyWorld's supply chain. The systematically prepared exposés contain detailed data about the project and its profitability.

### **Local projects – global investors**

The cooperation with different European partners allows GreenEnergyWorld direct contact to project developers and buyers in different markets. The trading platform [www.green-energy-world.com](http://www.green-energy-world.com) acts as interface between local project owners and global investors. At present wind and solar projects in Germany, Bulgaria, Italy, Romania, Poland, Greece and Spain are on offer.
