GreenEnergyWorld unites capital and ideas

Issuer GreenEnergyWorld GmbH

- New marketing contracts for 50 MW at the HUSUM WindEnergy 2008

GreenEnergyWorld draws a positive balance after exhibiting at the HUSUM WindEnergy 2008. "Quantity and quality of our new contacts at the important international wind fair are leaving nothing to be desired", states business development manager Denis Kühn. At the fair in September the GreenEnergyWorld team negotiated with more than 100 potential cooperation partners, project developers, investors and service providers from 17 European countries, the U.S., China, India, Israel and Thailand about future projects and prospective collaborations. The results are marketing contracts for over 50 MW of planned and turnkey wind farms. Denis Kühn is especially glad about the interest of project developers from the new EU-countries: "That motivates us for our next fair presence at the POLEKO in Poznań (Poland) end of October. The wind energy sector is developing very dynamically in these markets. That is why we want to expand our portfolio of offers here and to acquire new interesting projects for our investing clients."

About GreenEnergyWorld

The GreenEnergyWorld GmbH, residing in Berlin, is a service provider in the field of renewable energies. As a marketing agency the company supports project developers and operators with the implementation and marketing of wind and solar farms.

The commitment addresses all projects stages from greenfield, development, turn key to operation and repowering. The online project market www.green-energy-world.com is an international exchange interface for global investors and local project developers. Projects are offered from a variety of European countries.
