

Press Release

20 October 2008

GreenEnergyWorld – International Marketing Agency for Wind Energy Projects at the POLEKO 2008 in Poznań

From 27th - 30st October Renewable Energies will again be the focus at the international environmental fair POLEKO 2008 in Poznań. GreenEnergyWorld will be among the exhibitors. The Berlin-based company markets wind parks in Europe. This fair will be a great opportunity to meet with procurement manager Roland Schaepers and his polish colleague Monika Godzinska at the German joint stand 125 in hall 5.

With this fair GreenEnergyWorld plans to match with her success at the international wind fair HUSUM Wind Energy 2008 earlier this year, where she was able to allocate marketing contracts for more than 50 MW wind power capacity. New projects are in the process of negotiation. Very striking is the growing interest of East-European project developers in GreenEnergyWorld's services. Shortly before his departure to Poznań Roland Schaepers comments: „This is very motivating for us as an exhibitor on the fair in Poland. Generally, the wind sector in the East-European countries is developing very dynamically. For this reason we are planning to acquire further polish wind park projects into our portfolio. We also observe a growing demand for projects from these markets by our clients. Which is just the right incentive for us to acquire and offer them new and interesting investment opportunities in this region.“

About GreenEnergyWorld

Green Energy World GmbH is a service provider in the field of renewable energies. As a marketing agency this company supports project developers and operators with the implementation and marketing of their wind and solar farms.

GreenEnergyWorld's commitment addresses all project stages from greenfield, development, turn key to operation and repowering. The online project market www.green-energy-world.com is an international exchange interface for global investors and local project developers. Projects are offered from a variety of European countries.
